## northAmerican® Protection Plan

### Maximum Value Protection\* (MVP)

When the full replacement protection of MVP is desired, you should select the level of protection that covers the total value of your belongings. At a minimum, the value you declare must be equal to \$6.00 per pound times the total weight of your shipment. You may use a higher valuation rate per pound. If your total valuation falls between protection levels listed on the MVP chart, your full replacement protection and cost will be based on the next highest level.

### Basic Liability

Basic Liability Protection provides repair or replacement for up to a maximum of \$.60 per pound per article. There is no charge for Basic Liability Protection but it must be selected in the valuation section of the Bill of Lading. If left unselected, valuation coverage defaults to MVP.

### Is the Minimum Level Enough?

The level of protection you actually need for your household belongings may be greater than minimum levels based on your total shipment weight. Consult your homeowner's or renter's insurance policy for recommended coverage levels or use the inventory worksheet on the back side. When determining the protection level for your household inventory, be sure to consider any high value items such as artwork, electronic equipment, and crystal and porcelain collectibles. If you desire full replacement coverage, you must request Maximum Value Protection in writing on the Bill of Lading in the valuation section.

#### Summary of Terms and Conditions

\*Maximum Value Protection: MVP covers the cost to repair or replace, whichever is less, any household item that is damaged, lost or destroyed during your move up to the dollar amount that you declare as the replacement value of your possessions. Replacement is at today's full replacement cost - not a depreciated value. Complete replacement of multiple items, sets of china, gold and silver flatware, and crystal glassware are excluded. MVP pairs and sets protection may not apply to some corporate relocation contracts with North American. Consult your company's relocation program. North American charges for MVP are based on the protection level and deductible option you select in writing. You must declare a minimum value no less than \$6.00 per pound times the total shipment. The MVP protection plan is available only on shipments within the United States (except Hawaii), and shipments to or from Canada. Additional charges apply if storage-in-transit is required. Valuation costs are doubled for shipments to or from Alaska.

## Alternative methods for determining valuation:

The home insurance industry often recommends a protection amount for household contents equal to 50% or more of the value of your home. Factor in high value items such as art, antiques, crystal and collectibles.

FOR EXAMPLE	
Home Value:	\$150,000
Protection %:	x 50%
Protection Level:	\$75,000

  

YOUR HOME	
Home Value:	_____
Protection %:	_____
Protection Level:	_____

Independent insurance actuaries have determined an average household today represents a value of \$6 – \$8 per pound.

FOR EXAMPLE	
Shipment Weight:	10,000 lbs.
Value/Pound:	x \$8
Protection Level:	\$80,000

  

YOUR HOME	
Shipment Weight:	_____
Value/Pound:	_____
Protection Level:	_____
