Sales Award-Men's Rings

Traditional Collegiate-Style Rings

The traditional, or sometimes called collegiate, ring style harkens back to the classic college ring with a colored stone top over detailed side shanks.

A great feature of this ring style is the versatility for customization this ring provides. Each side shank can be intricately detailed with initials, company logo - even modeled buildings or faces! Colored ring top stones can be faceted or smooth, or removed altogether for a custom metal insert or add-on emblem.
